There is no N/A after the "If yes, are you assessing different outcomes?" and the system defaults an answer.

4. How will you know if you were successful in your efforts to teach this outcome?

Success of outcome will be determined by a series of tests, a research paper, a political letter, in class participation, and moodle discussion's grade average combined. If the class's grade average is 90% or above, this will indicate a mastery of the subject material learned. 80%–89.9% will indicate above average understanding of subject material with 70% – 79.9% indicating average. Anything below 70% will indicate below average understanding. I will conclude the class successful if a grade average of 70% or higher is met.
