## Your Email *

Please select your course and name from the
Pre-College - Math I - 1096002 - Janette Harrington - Fall 2020
drop-down menu. If your course or name are incorrect or missing, contact the Curriculum and Assessment Administrative Assistant, 541-506-6037 or ggilliland@cgcc.edu.

## Part A: Your Plan

## DIRECTIONS

1. Choose three of your course outcomes to assess and report on this term (these will also be used in your Student Course Evaluation survey):

Outcome \#1 *
Outcome \#2 *

## Outcome \#3 *

Have you completed an assessment for this
Interpret charts, graphs and data to answer real life mathematical problems.

Solve measurement and common geometry problems through the use of mathematical procedures including technology.

Using the T130-XS calculator, apply common math skills to real life problems involving whole and rational numbers.

Yes

## course prior to this term?

If yes, are you assessing different outcomes? No

## Comments:

2. To which degree(s) or certificate(s) does - Pre-College Program your course map?
Degree, Certificate, \& Program Outcomes

## Method of Assessment

3. What methods will be used to assess individual student understanding of each of these outcomes? (Please be specific.)

No

Outcome \#1: Method to assess student understanding *

Test - During approximately the middle of the term, students, while using a calculator, will take a test, composed of $20-27$ written mathematical problems. $70 \%$ accuracy - If criteria is not met, student will assess his/her weaknesses, then study and take another test that is composed of similar questions.

Outcome \#2: Method to assess student understanding *

Outcome \#3: Method to assess student understanding *

Project - Students will pose a personal question on which they can collect daily data. At the end of two weeks, data will be graphed and interpreted.

After completion of a hypothetical room remodel, students will take a test that includes 4 written questions concerning area, perimeter, and volume. - 75\% accuracy
4. How will you know if you were successful in your efforts to teach this outcome?

A minimum of $70 \%$ of the students tested will receive a score of $70 \%$ or better.

## Outcome \#1: *

Outcome \#2: How will you know if you were A minimum of $70 \%$ of submitted projects will be completed as assigned. successful in your efforts to teach this outcome? *

Outcome \#3: How will you know if you were successful in your efforts to teach this outcome? *

A minimum of $70 \%$ of the students tested will receive a score of $75 \%$ or better.
5. Instructor Questions: Create two course specific questions to be included on the Student Course Evaluation.
Question \#1

Outcome \#1 Having completed this course, are you now better able to correctly answer written math problems, using a calculator, than you were three months ago? Answers: Not at all A little bit Much better I already knew this stuff

## Question \#2

Outcome \# 3 Having completed this course, are you now better able to correctly answer measurement and geometry problems? Answers: Not at all A little bit Much better I already knew this stuff

Do you require the names of students who NO complete the course evaluation survey? (Please note: names will be sent to instructors the Thursday before term ends)

```
Reminder, when completing Part B,
instructors will be asked the following
questions:
Describe anything you did to assist the
institutional effort to support students in
improving achievement of the specified
criteria for the following Core Learning
Outcomes (CLO):
1. CLO#1 - Communication - "Sources and
Evidence" and/or "Organization and
Presentation"
2. CLO#2 - Critical Thinking/Problem
Solving - "Student Position" and/or "Evaluate
Potential Solutions"
3. CLO#4 - Cultural Awareness - "Curiosity"
(Encouraging our students to "Ask deeper
questions about other cultures and seek out
answers to these questions")
4. CLO#5 - Community and Environmental
Responsibility - "Understanding Global
Systems" and/or "Applying Knowledge to
Contemporary Global Contexts"
5. CLO#3 - Quantitative Literacy -
"Application/Analysis" and/or "Assumptions"
```
