

Course Assessment- Part B: Your Results & Analysis

COMPLETE

#707

Please select your course and name from the drop-down menu. If your course or name are incorrect or missing, contact Sara Wade, the Instructional Services Administrative Assistant, 541-506-6037 or swade@cgcc.edu.

BI211- Principles of Biology- Emilie Miller- Part B- Fall 2025

*** Part B: Your Results DIRECTIONS** 1. Report the outcome achievement data gathered via the assignments, tests, etc. you identified for each outcome (question 3) of your Part A. (Only include data for students who completed the course. Do not include students who withdrew or earned an incomplete) Data for all 3 outcomes should be reported below.

50% of my students achieved 70% or higher on their exams.

*** Outcome #1**

Use the scientific method, including experimental design, data collection, and presentations of results and conclusions while analyzing their individual thinking and learning styles and how their styles can be integrated with methods used in science

*** % of students who successfully achieved the outcome (C or above)**

50%

*** Outcome #2**

Assess the strengths and weaknesses of scientific studies in biochemistry and cell biology and critically examine the influence of scientific and technical knowledge of biochemistry and cell biology on human society and the environment.

*** % of students who successfully achieved the outcome (C or above)**

50%

*** Outcome #3**

Communicate concepts in genetics, biochemistry and cell biology using appropriate terminology in both written and verbal forms.

*** % of students who successfully achieved the outcome (C or above)**

50%

*** ANALYSIS 3. What contributed to student success and/or lack of success?**

Fewer instruction days due to 2 holidays falling on the T/Th class times and an unplanned day off from a water leak.

*** 4. Helping students to realistically self-assess and reflect on their understanding and progress encourages students to take responsibility for their own learning. Please compare your students' perception of their end-of-term understanding/mastery of the three outcomes (found in student evaluations) to your assessment (above) of student achievement of the three outcomes.**

Students completed a self-reflection after the first exam and a mid-term reflection of their grade midway through the term. They have made some progress from their beginning of term graded and final grades.

*** 5. Did student achievement of outcomes meet your expectations for successfully teaching to each outcome (question 4 from Part A)**

no

*** 6. Based on your analysis in the questions above, what course adjustments are warranted (curricular, pedagogical, student instruction, etc.)?**

Hopefully more in-class time. I feel like my class lost focus with the amount of time between class sessions. I may return to a flipped-classroom to have access to more class time.

7. What resources would be required to implement your recommended course adjustments (materials, training, equipment, etc.)? What Budget implications result?

More PD \$. \$500 does not begin to cover the cost of travel to conferences.

*** 8. Describe the results of any adjustments you made from the last assessment of this course (if applicable) and their effectiveness in student achievement of outcomes.**

I maintained in-class lectures as a trial.

9. Describe how you explain information about course outcomes and their relevance to your students.

Syllabus. I connect past concepts to what we will be learning each sessions and explain their relevance moving forward.

10. Please describe any changes/additions to instruction, curriculum or assessment that you made to support students in better achieving the CGCC Institutional Learning Outcomes: ILO #1: Communication. The areas that faculty are focusing on are: "Content Development" and/or Control of Syntax and Mechanics" and ILO #2: Critical Thinking/Problem Solving. The areas that faculty are focusing on are: "Evidence" (Critical Thinking) and/or "Identify Strategies" (Problem Solving). ILO #4: Intercultural Knowledge and Competence. The area that faculty is focusing on is: "Openness" (Encouraging our students to "Initiate and develop interactions with culturally different others") ILO #5: Community and Environmental Responsibility. ILO#3 - Quantitative Literacy - "Assumptions"

(No response)
