Assessment of Outcomes Achievement
Degree, Certificate, Program

Name of Degree, Certificate or Program: Associate of Applied Science: Nursing

1. Describe assessment results.

Case Study Capstone Project: The case study capstone provides students with the ability to integrate critical thinking with the skills and knowledge they gained throughout the program in order to care holistically for a mock patient. Nursing students are evaluated on their individual and group presentation skills. The quality of content, participation in the group, ability to follow the writing standards, performance on individual article summary, and communication of how the nurse's role as a provider, manager, communicator, and as member of the discipline provides holistic care for the case study patient. The capstone project continues to be a valuable learning exercise and 23/23 (2017-2018), 27/27 (2018-2019), 22/22 (2019-2020), 22/22 (2020-2021), and 20/20 (2021-2022) students completed and passed at a rate of >75% for the case study capstone project.

Clinical Performance Evaluation Tool (CPE): The CPEs utilized throughout the CGCC nursing program are a direct reflection of safety principles, nursing skills, and theory curriculum mandated by the Oregon State Board of Nursing (OSBN) and Oregon's Nurse Practice Act. Students are occasionally dismissed from clinical settings (failure to meet CPE) due to unsafe clinical practice. Clinical instructors have a duty to the public to dismiss unsafe students. Clinical performance (assessed by CPE) is a critical part of a nursing program and needs to continue to be assessed on an ongoing basis. An example of the CPE tool used in NUR 221 is attached. Bolded OCNE Competencies must be passed successfully by the end of the clinical term. The OCNE Competency Rubric is designed to convey measurable performance expectations. This document provides a progressive framework with leveled benchmarks, supplies systematic feedback to students about their performance and ultimately, promotes student learning. The Competency Rubric has three components: (1) competency to be demonstrated; (2) dimensions which align the parts of the competency; (3) description of each benchmark to be assessed. Benchmarks specify the three levels of progression within the OCNE curriculum: the end of third, sixth and ninth terms. A student may fail to progress if they perform unsatisfactorily on any outcome met in a previous term.

Program attrition rates by course:

First year

- NRS 110 27/30 90% (Exam, Medical)
- NRS 111 23/24 95% (Withdrawal life choice)
- NRS 112 21/21 100%
- NRS 230 21/24 87.5% (Exams, medical, life)
- NRS 231 21/24 87.5% (Exams, medical, life)
- NRS 232 27/30 90% (Exams, medical, life)
- NRS 233 23/24 95.8% (Exams, medical, life)

Second year

- NRS 221 18/19 94.7% (Medical)
- NRS 222 20/20 100% (2 reentry)
- NRS 224 20/20 100%

National Council Licensure Examination- RN (NCLEX-RN): National Council of State Boards of Nursing (NCSBN) is an independent, not-for profit organization through which boards of nursing act and counsel

together on matters of common interest and concern affecting public health, safety and welfare, including the development of nursing licensure examinations. The NCSBN develops psychometrically sound and legally defensible nurse licensure and certification examinations consistent with current practice. NCLEX-RN is the national standard required for all nurses to gain RN licensure.

CGCC pass rates:

2017-2018: 21/23 95.6% passed on first attempt. After reviewing the events of the 2016-2017-year, full time second year faculty altered the calendar to have the students have the Kaplan 3-day review course in the 3rd week of the term instead of at the end of the term.

2018-2019: 20/27 74.1% passed on first attempt.

2019-2020: 21/22 95.5% passed on first attempt. One student still has not taken the NCLEX Exam. 2020-

2020-2021: 20/22 91% passed on first attempt. Two students still have not taken the NCLEX Exam. Students were then required to complete all Kaplan practice exams throughout the term. Students were strongly counseled at the end of the term to take the NCLEX-RN as soon as possible after graduating (provided they felt ready). They were also contacted periodically after graduation to let them know that faculty was there if they needed help and to provide encouragement.

2021-2022 14/20 70% *14/14 of students have passed 100% *6/20 students have not taken NCLEX

Full time second year nursing faculty and the Director of Nursing & Health Occupations review Oregon State's NCLEX-RN results and licensure as well as other states identified where students are testing. Over the evaluated three years, CGCC students have received licensure in Washington, California, Arkansas, and Tennessee in addition to Oregon.

CGCC's OSBN three-year pass rate is 87.5% and a two-year of 83.3%.

2. Identify any changes that should, as a result of this assessment, be implemented towards improving students' attainment of degree, certificate, or program outcomes.

Course Assignments from Nursing 110-224, Pathophysiology NRS 232 and NRS 233, and Pharmacology NRS 230 and NRS 231: In reviewing the program, it was evident that the attrition rates were higher in the first-year courses than second year of the program. In evaluation the attrition, it was noted that student's had difficulty with problem solving, analysis, application, and critical thinking exam style that is used in the NCLEX testing process. Secondly, student illness/medical needs and life situations compounded the attrition rate. To address attrition concerns, faculty implemented or exploring implementing the following:

- Application process change from the entry essay to the college Placement Test
- Evaluate timelines for accepting prerequisites for writing and math
- Consider a health occupations chemistry course
- Exams started with only comprehension knowledge-based questions in fall term year one then increase by adding 25% of application/analysis/NGN type questions each term (Implemented 2021)

- Faculty presented OCNE philosophy, OCNE program, flipped classrooms, holistic teaching in the classroom, and introduced critical thinking/problem solving assignments currently used in program (Completed 2022)
- Meeting with prerequisite instructors to align curriculum to meet OCNE curriculum needs (Completed 2022)
- Communications and brain storm sessions with non-nursing faculty to increase problem solving critical thinking assignments in the prerequisite courses (Completed 2021-22)

Measurement Tool used for academic year 2021-22 Nursing, Pathophysiology and Pharmacology Course

Assignments:

- NRS 110 Evidence-Based Practice project
- NRS 110 Cultural interview an essay
- NRS 110 Head Start Project
- NRS 111 Problem Behavior Group project and Self Evaluation
- NRS 111 Dementia Problem Behavior Skit and Factsheet discussion forum
- NRS 112 Nursing Care Plan
- NRS 112 OB Article Summary
- NRS 112 OR Article Summary
- NRS 112 Ethics Paper
- NRS 110- NRS 112 Self Health Assessment and Plan
- NRS 232 Pathophysiology PowerPoint Discussion Forum peer review
- NRS 230 Autobiography of a Drug discussion forum peer review and reflective questions
- NRS 233 Pathophysiology patient teaching brochure addressing medical literacy, lay population
- NRS 231 Medication Teaching Plan addressing learning styles, teaching strategies

3. Describe your plan for implementation of any changes.

- Reboot the Nursing Application Committee post COVID-19
- Update Nursing Program Entry Application
- Schedule quarterly communications with prerequisite chairs to talk about OCNE philosophy, OCNE program, flipped classrooms, holistic teachings in the classroom, and critical thinking/problem solving assignments currently used in prerequisite courses and if they were successful.
- Work with Science Department Chair to investigate a health occupations chemistry course
- Continue starting with only comprehension knowledge-based questions in fall term year one then increases by adding 25% of application/analysis/NGN type questions each term

4. Departmental faculty involvement. All faculty (adjunct and full time, clinical and theory faculty) take part in the CPEs assessment, capstone, and portfolio. In addition, all faculty take part in reviewing clinical skills taught and the necessity of needing check-offs for each skill. If there are significant problems in a particular area, concern goes to team meetings and if warranted it goes to a full-time faculty meeting to discuss improvement strategies. Once decisions are made, it is disseminated to all faculty. With retiring faculty, increased mentorship will be needed in 2022-23 as new faculty are hired. To address hiring and introduction to OCNE, a faculty handbook will be implanted.

5. Evaluate the assessment strategy. Evaluations utilized by faculty and staff are founded and follow state and national standards set in place by Oregon State Board of Nursing, the National Council of State

Boards of Nursing (NCSBN), and the American Nurses Association and are explained in detail in question #1.

6. Additional comments.

Many changes will be coming to the nursing program as 50% of the nursing faculty are retiring or reducing to part time. Full time faculty for next year will meet with the Director to reallocate workload, align curriculum, and leadership structure to address the vacancies and concerns.
